

I am concerned about the LPFM proposal which would give LPFM stations priority over FM translator service. I currently receive K-Love radio on 88.5. This is the only station I can pick up in this part of New Mexico which provides Christian contemporary music on a continual basis. Continued access to K-Love is in the public interest. Many local businesses use this music as the background for telephone calls and for their in-store music. There is no local station which provides the quality of programming K-Love provides. Please do not allow another broadcaster to take over the frequencies K-Love uses in this area, which include 90.7 and 90.1 in addition to the one on which I listen.
